Q: How to access static image in jrubby Rails app I am trying to add a static asset to my Rails app. In app/assets/images I have a folder with these images, [1] - [3]:

```
[1] - puts "#{Rails.root}/app/assets/images/"> [2] - puts "#{Rails.root}/app/assets/images/"> [3] - puts "#{Rails.root}/app/assets/images/">
```

Here is my content of config/initializers/assets.rb

```
Rails.application.config.assets.paths "cats") %>
```

I get the error: Could not find file 'cats'

Please let me know how to access the images correctly. Thanks in advance.

A: Try the following (assuming all images are in ./app/assets/images):

```
"cats" %>
```

The asset helpers output is concatenated with the output of the "content" argument. The "content"

---

argument can be an array of content to display. Note that "cats") %> does not work because "cats" %> does not work either. A:
